

Jatoba is often referred to as 'Brazilian or South American Cherry'. This solid dense wood is a rich russet/salmon in colour with dark and lighter accent stripes. The wood darkens over time to a rich red colour. WoodTrend solid Jatoba flooring is unfinished and can be treated with wood floor oils or lacquers. It is very durable and ideally suited for use in residential and non residential areas.

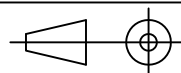

Product	:	FSC JATOBA 127 mm Prime Solid Unfinished Hardwood Flooring
Dimensions	:	19mm x 127mm x 305-2134mm (Min. avg. length: 1067mm)
Species	:	Jatoba
Quality	:	Prime
Surface Finish	:	Unfinished
Edge Detail	:	4 sides Micro Bevelled
Type	:	Solid Hardwood Planks
Assembly	:	T&G 4 Sides
Installation	:	Nailed, Glue Down or Elastilon
		Structural Floor – BS 8201:1987 – maximum span of joists is 505 mm
